

SSPA 1-18G 10W

Introduction

- ① Ultra-wideband doubled frequency CW SSPA
- ② High frequency linear communication SSPA
- ③ Pulse system SSPA
- ④ Ka-band KW PW / CW SSPA
- ⑤ Q band 1~400 W CW SSPA
- ⑥ Ultra-wideband doubled frequency traveling wave tube driver MPM
- ⑦ Phased array Tx/Rx components
- ⑧ V~W band SSPA
- ⑨ THZ frequency conversion, frequency doubling and amplifying module

High performance, high power, high efficiency, light weight, miniaturization and easy to use are the characteristics of our products. standardization and serialization are our goal.

1-18G 10W

Operating system: CW/PW compatible

Application: outdoor (-40~+50°C)
Service life: ≥15 years
Saturation output power: ≥43dBm
Power gain: ≥65dB
Small-signal gain: ≥80dB
Modulation depth: ≥90dBc

<http://www.probecom.cn>

Second harmonic: $\geq 12\text{dBc}$

Polarization mode: V/H polarization switchable

Communication: Local control / Ethernet remote control
